I recently finished the first draft of the the first of my books, entitled "Hilbert's fifth problem and related topics", based on the lecture notes for my graduate course of the same name. The PDF of this draft is available here. As always, comments and corrections are welcome.

I know this is sort of besides the point, but as a minor correction: Your link to the 2011 blog posts is to the 2010 archive... I am looking forward to reading the draft.
[Link removed, thanks – T.]
