Mathematics Seminars List

Terence Tao · 7 April 2020

https://terrytao.wordpress.com/2020/04/07/mathematics-seminars-list/

tao2typ · converted to Typst 2026-10-14 (UTC)

My student, Jaume de Dios, has set up a web site to collect upcoming mathematics seminars from any institution that are open online. (For instance, it has a talk that I will be giving in an hour.) There is a form for adding further talks to the site; please feel free to contribute (or make other suggestions) in order to make the seminar list more useful.

UPDATE: Here are some other lists of mathematical seminars online:

- Online seminars (curated by Ao Sun and Mingchen Xia at MIT)
- Algebraic Combinatorics Online Seminars (maybe using the same data set as the preceding link?)
- Online mathematics seminars (curated by Dan Isaksen at Wayne State University)
- Math seminars (run by Edgar Costa and David Roe at MIT)

Perhaps further links of this type could be added in the comments. It would perhaps make sense to somehow unify these lists into a single one that can be updated through crowdsourcing.

EDIT: See also IPAM's advice page on running virtual seminars.

Thanks for today's talk: https://terrytao.files.wordpress.com/2020/04/collatz.pdf
I find this set of slides more accessible:
Click to access collatz.pdf

Lior Silberman · 7 April 2020

For a could of weeks already there's been an excellent page at MIT, maintained by students Ao Sun and Mingchen Xia.
https://math.mit.edu/~aosun/online_seminars.html

Asgar · 7 April 2020

Here is a link to the One World Probability Seminar (which has also links to other math related One World Seminars) https://www.wim.uni-mannheim.de/doering/one-world/

Dr. Anil Pedgaonkar · 8 April 2020

but when and where nis your online seminar. we clicked the link it gives website. we wanted your seminar today

Becky · 8 April 2020

Thank you for the links!
All the best from Germany, Becky

Pedro Sánchez Terraf · 8 April 2020

Hi! There is a list of logic seminars at http://miguelmath.com/webminars.html
Best wishes,

ndwork · 8 April 2020

This is great! Thank you! There seems to be an issue where 3pm eastern becomes 0pm pacific, which is midnight.

Leonid Petrov · 8 April 2020

There is a list of online probability seminars curated by Columbia people
http://www.math.columbia.edu/department/probability/seminar/prob_sem_global.html

Manuel · 8 April 2020

Yet another list on statistical seminars:

> Remote seminars

 **Bunyamin Sari** · 8 April 2020

Banach spaces webinars on Fridays at 9AM CDT
http://www.math.unt.edu/~bunyamin/banach

 **Aurel Page** · 9 April 2020

Here is another one: https://mathseminars.org/

 Andrew Sutherland · 10 April 2020

+1 for https://mathseminars.org/. This site is based on an open-source project intended to facilitate crowd-sourced seminar listings (both virtual and physical). Anyone can create listings for seminars or conferences, either as an organizer or as a curator. These listings will automatically appear once the individual has been endorsed (similar to arXiv endorsing). The goal is to distribute the task of maintaining up to date listings as broadly as possible.
When browsing talks and seminars, you can filter by topic or institution, tag your favorite talks or seminars, and export to your calendar (new talks in a seminar you have subscribed to will automatically show up in your calendar).
Times are automatically translated to your local time zone.

 **xi'an** · 15 April 2020

We have started the ABC World Seminar, every other Friday at 11:30, UK time. (ABC stands for approximate Bayesian computation.)

 **Alexander Wong** · 29 April 2020

The seminar list under Jaume de Dios does not work. Please fix, thanks.

 **Jaume** · 29 April 2020

Hi! I'm working on it, it seems there was an issue with the renewal of my domain. In the meantime (and in the future) it's better to use mathseminars.org anyways, since it currently does have more information. Sorry about it!

Rooykard rooykard · 1 May 2020

Reblogged this on http://www.jonbeshkhalgh.com.

 **Sai Gopal** · 14 May 2021

This is certainly a great help! Otherwise, earlier I had to go on to the websites of some of these institutes and then check out if there are any upcoming seminars. This idea of collecting all information at one place is a noble thought.
