Resources for displaced mathematicians

Terence Tao · 2 March 2022

https://terrytao.wordpress.com/2022/03/02/resources-for-displaced-mathematicians/

tao2typ · converted to Typst 2026-10-14 (UTC)

In this post I would like to collect a list of resources that are available to mathematicians displaced by conflict. Here are some general resources:

- The IIE Scholar Rescue Fund
  - Statement on the war in Ukraine
- Scholars at Risk
  - Statement of solidarity with the people of Ukraine and Ukrainian higher education
- The New University in Exile Consortium programs for scholars
- (Europe) European fund for displaced scientists (a joint ALLEA-Breakthrough Prize Foundation partnership)
- (Brazil) The Sao Paulo Research Foundation has an initiative for Researchers at Risk.
- (Canada) Joint CRM-ISM initiative in support of mathematicians in distress
- (Canada) WES gateway program to assess educational credentials for displaced individuals
- (France) The French PAUSE program (National program for the urgent aid and reception of scientists and artists in exile)
  - PAUSE has a special call for Ukrainian researchers at risk.
- (Germany) The Humboldt Foundation's Philipp Schwartz initiative
  - Special measures for the current crisis include postponing the deadline for applications to March 18 for Ukrainian scholars, and arrangements for current recipients from Russia who are threatened due to their critical attitude to the war to receive fellowship extensions.
- (Germany) DFG Refugee Researchers program
  - Special programme for Ukraine
- (UK) Cara – a lifeline to academics at risk
  - Statement on the Ukraine crisis
- (UK) Universities of Sanctuary network
  - Statement on Ukraine
- (UK) The Isaac Newton Institute for the Mathematical Sciences has a Solidarity list for researchers in the Mathematical Sciences, as well as a Solidarity for Mathematicians programme for displaced mathematicians.
- (UK) The University of Oxford Mathematical Institute has outreach sessions for Refugees and Asylum and Sanctuary Seekers to acclimate them to the academic environment in the UK.
- (USA) Harvard University's Scholars at Risk (distinct from the preceding program of the same name)

There are also resources specific to the current crisis:

- Science for Ukraine
    - See this web page for some background information on this initiative.
- Jobs for Ukraine
- Help for Displaced Ukrainian Mathematicians
- (Europe) The member universities of the Guild of European Research-Intensive Universities have a number of support measures for researchers, academics, and students affected by the war in Ukraine.
- (Europe) The European Research Centres on Mathematics (ERCOM) committee of the EMS has a number of offers of assistance to mathematicians who are refugees of the current war.
- (Europe) The EU agency EURAXESS has an initiative ERA4Ukraine that collects various support initatives for Ukrainian researchers.
- (North America) Opportunities in North America for Ukrainian Mathematicians
- (Austria) Austrian Academy of Sciences JESH academic mobility program – call for applications from Ukrainian researchers
- (Austria) FWF Austrian Science Fund has the Crisis Support for Researchers from Ukraine program.
- (Belgium) The KU Leuven program for researchers from the global South has relaxed its eligibility requirements for Ukrainian refugees.
- (Belgium) The Université libre de Bruxelles has implemented emergency procedures to welcome Ukrainian students who have fled or plan to flee Ukraine because of the war. Contact: helpukraine@ulb.be
- (Canada) A statement from the presidents of Canada's federal research granting agencies to support Ukrainian research trainees (Additional contact: Lior Silberman lior@math.ubc.ca)
- (Canada) PIMS Mathematical Scientist Support Fund Program
- (Canada) NSERC Special Response Fund for Trainees (Ukraine)
- (Czechia) Announcement from the Czech Academy of Sciences (see also their "Help for Ukraine" page)
- (Czechia) Announcement from the Czech Science Foundation
- (Czechia) NF Neuron grant for Ukrainian scientists to study in the Czech republic
- (Finland) Call for grants for Ukrainian researchers in Finland
- (Finland) The University of Helsinki offers free courses at its Open University for citizens of Ukraine.
- (Germany) Opportunities in Germany for mathematicians from Ukraine (administered by the German Mathematical Society (DMV))
- (Germany) Support and assistance for Ukrainian students and scientists (administered by the German Academic Exchange Service (DAAD))
- (Germany) Funding for Refugee Scholars and Scientists from Ukraine by the Volkswagen Foundation (Additional contact: Delio Mugnolo delio.mugnolo@fernuni-hagen.de)
- (Germany) The Deutsch-Ukrainische Akademische Gesellschaft page on support for students and researchers from Ukraine
- (Germany) University of Muenster statement on Ukraine
- (Germany) Berlin Mathematics Research Center MATH+ Support for mathematicians for Ukraine

- (Luxembourg) The Luxembourg National Research Fund offers Temporary FNR support for Researchers who have fled the war in Ukraine.
- (Hungary) There are some resources available at the Renyi Institute in Hungary. Contact: Andras Stipsicz stipsicz.andras@renyi.hu
- (Poland) Science for Ukraine Action at AMU PAN (Polish Young Academy – Polish Academy of Sciences) Visits of Ukrainian scientists to the Polish Academy of Sciences
    - This effort is also being supported by the National Academy of Sciences in the US via the Safe Passage Fund; more details here.
- (Poland) The National Science Center has a special program for researchers from Ukraine.
- (Sweden) The Swedish Foundation for Strategic Research has individual grants for Ukrainian scientists.
- (Sweden) The Royal Swedish Academy of Sciences announces scholarships for Ukrainian scientists to perform research in Sweden.
- (Taiwan) Taiwan is offering scholarships for Ukrainian students and scholars.
- (USA) The National Academy of Sciences has a page for resources supporting Ukraine's scientists, engineers, and health care workers.
- (USA) The American Mathematical Society has a page on resources for displaced mathematicians.

Finally, there are a number of institutes and departments who are willing to extend visiting or adjunct positions to such displaced mathematicians:

- (Australia) The Sydney Mathematical Research Institute has launched a Visitor Program for Displaced Mathematical Scientists from Ukraine.
- (Austria) The Erwin Schrodinger Institute has a Special Research Fellowship for Ukrainian Scientists.
- (Brazil) IMPA offers a program in support of mathematicians affected by war or persecution.
- (Canada) Augusto Gerolin's research group at the University of Ottawa has PhD and postdoctoral positions available; Ukrainian students are highly encouraged to apply.
- (Denmark) AUFF-Ukraine research fellowships at AIAS, Aarhus University
- (Germany) MathCoRe at the Otto von Guericke University of Magdeburg supports visiting scientists affected by the current conflict. (Contact information contained in the link.)
- (Germany) Oberwolfach has a statement on Solidarity with Ukraine – support for Ukrainian scientists
- (Germany) Friedrich Alexander University (FAU) at Erlangen-Nuremberg has a page on assistance to Ukraine.
- (Israel) Tel Aviv University has launched an emergency fellowship fund for Ukrainian graduate students.
- (Israel) The Weizmann Institute of Science has a program to support visiting students and postdocs and encourages applications from Ukraine.
- (Israel) The Technion opened a specific budget to host undergraduate and graduate students, post-docs, and faculty from Ukraine. Contacts: Ms. Ortal Arazi Minyan ortala@int.technion.ac.il (for students) and Ms. Lisa Aisman lisa@technion.ac.il (for postdocs/faculty)
- (Israel) The Hebrew University of Jerusalem opened an emergency aid for researchers and students from Ukraine. The invitation is for a period of up to four months.

- (Israel) Ben Gurion University has a program for students and researchers affected by the war. Contact: oiaa@bgu.ac.il
- (Italy) Politecnico de Milano welcomes Ukrainian students and researchers.
- (Luxembourg) The University of Luxembourg offers support initiatives for displaced researchers and students from Ukraine.
- (Netherlands) Utrecht University has a page containing Support from the Mathematical Institute for students, lecturers and researchers from Ukrainian universities.
- (Poland) The Polish Academy of Sciences offers help to Ukrainian mathematicians, including accommodation and employment. Contact: mail.amu.pan@gmail.com
- (Poland) The Institute of Mathematics of the Polish Academy of Sciences (IMPAN) in particular offers such help to Ukrainian mathematicians. Contact: Piotr Achinger pachinger@impan.pl
- (Poland) The CS/math department of the University of Warsaw (MIMUW) also offers help. Contact: Piotr Achinger pachinger@impan.pl
- (Spain) A visiting position at the Universidad Carlos III de Madrid, aimed at Ukrainian nationals
- (UK) The London Institute for Mathematical Sciences is hiring five Arnold Fellows from Russia, Ukraine and Belarus in theoretical physics and mathematics.
- (USA) My home department at UCLA, in cooperation with IPAM, is likely to have a position available for such mathematicians. Contact: Dimitri Shylakhtenko shlyakht@math.ucla.edu
- (USA) An announcement from Columbia University
- (USA) The mathematics department at Indiana University, Bloomington has several positions. Contact: Kevin Pilgrim pilgrim@iu.edu
- (USA) The mathematics department at Michigan State University may have up to two positions for mathematics faculty who are displaced by the Ukrainian crisis. Applicants are encouraged to contact a faculty member at MSU who will support their nomination.
- (USA) The mathematics department at Johns Hopkins University has 2-3 one-year visiting positions for next year, and is willing to waive some of the required documents for such applications for displaced persons. Contacts: David Savitt savitt@jhu.edu and Emily Riehl eriehl@jhu.edu.
- (USA) MIT could accept a few Ukrainian/Russian mathematicians as visitors. Contact: Pavel Etingof etingof@math.mit.edu
- (USA) Georgia Tech has a program for displaced students.
- (USA) George Mason University has a 2-year visiting scholar position in Math available starting Fall 2022, specifically targeting Ukrainian and Russian mathematicians affected by the crisis. Contact: Maria Emelianenko memelian@gmu.edu

If readers have other such resources to contribute (or to update the ones already listed), please do so in the comments and I will modify the above lists as appropriate.

As with the previous post, any purely political comment not focused on such resources will be considered off-topic and thus subject to deletion.

Comments (55)

Andrew Kosenko · 2 March 2022

Columbia sent a message on this topic just now; an excerpt is below:

“As hundreds of thousands of people are being forced from their homes, pouring into neighboring countries and nations across Europe, we, as an institution of learning, will expand the initiative we put in place for students and scholars displaced by the crisis in Afghanistan to include those seeking refuge from the war in Ukraine. We are eager to welcome these students and scholars to our campuses.”

Important to note – men between 18 and 60 are not currently permitted to leave Ukraine.

[Added, thanks – T.]

 **gpecc** · 2 March 2022

Dear Terry,

Please check this initiative:

https://scienceforukraine.eu/

Some explanation is here:

https://genevasolutions.news/science-tech/meet-the-latvian-scholar-rallying-support-for-ukrainian-researchers?fbclid=IwAR27bUNtdkxbvCsX8DlnULlXIJNveVu8IvsGkdUieJbSdTfkyg-aOWyuujI

[Added, thanks – T.]

 **Evangelos Bampas** · 2 March 2022

PAUSE, National program for the urgent aid and reception of scientists in exile (France)

https://www.campusfrance.org/en/pause-program-urgent-aid-scientists-exile

[Added, thanks – T.]

 **Piotr Achinger** · 3 March 2022

Thank you for this post!

The Polish Academy of Sciences offers help to Ukrainian mathematicians, including accommodation and employment. Contact mail.amu.pan@gmail.com .

The Institute of Mathematics of the Polish Academy of Sciences (IMPAN) in particular offers such help to Ukrainian mathematicians. Please contact me directly: pachinger@impan.pl

The CS/math department of the University of Warsaw (MIMUW) also offers help, though I don’t know of an official statement. Again, just contact me at pachinger@impan.pl and I will talk to people there.

The above are not listed (yet) on the map “Science for Ukraine”.

[Added, thanks – T.]

 **Radek Adamczak** · 3 March 2022

In addition to Piotr’s answer let me mention two relevant web pages:

https://amu.pan.pl/en/pomoc-ukrainie/

The ÖAW (Austrian Academy of Sciences) offers a special mobility program targeted at all Ukrainian scientists (including mathematicians) who had/have to leave their country: https://stipendien.oeaw.ac.at/stipendien/jesh-ukraine

[Added, thanks – T.]

Anonymous · 3 March 2022

Will this leads to an influx of academics from Russia and Ukraine such that the new grads will be at a disadvantage on the job market? I heard sometime before (maybe in the 80s?), a lot of established Russian mathematicians came to the US, and left many new grads jobless. There is no way a new grad can compete with established mathematicians in terms of publication record.

Yanky Landau · 3 March 2022

As a grad student myself (albeit in physics, not math) this does resonate with me. However, my framing for this is that Putin upended global stability; it happened and that's that. The cost for some people will be their lives, for some their families, for some financial hardships that will cripple their entire lives, and for some a decreased probability in getting their first choice of job. I am very happy that I am only in the final category

Christian Lessig · 3 March 2022

See the section Ukrainian scientists on this page: https://www.mathcore.ovgu.de/index.php?show=joinus

[Added, thanks – T.]

David Savitt · 4 March 2022

The math department at Johns Hopkins has 2-3 one-year visitor positions for next year : https://www.mathjobs.org/jobs/list/19628
Displaced mathematicians wanting to be considered for these could also contact me directly at savitt@jhu.edu, or Emily Riehl at eriehl@jhu.edu. The mathjobs application link asks for some materials, but this isn't necessary if someone might have trouble getting the materials together.

[Added, thanks – T.]

Gilles Lancien · 4 March 2022

To complete the message by Evangelos Bampas (2 March 2022). The link to the French program PAUSE dedicated to Ukrainian researchers :

Ofir G. · 5 March 2022

The Weizmann institute invites Ukranian graduate students and postdocs to apply to their Visiting Students Program. Information can be found at https://www.weizmann.ac.il/feinberg/supported-visiting-students-and-postdocs-program-ukrainians

I quote:
"The Feinberg Graduate School at the Weizmann Institute of Science invites advanced undergraduate, graduate students, and postdoctoral researchers to apply to our supported Visiting Students Program. The program welcomes students from Life Sciences, Mathematics & Computer Science, Chemistry, Physics, and Science Teaching to apply. Visitors will be hosted at one of our labs and will get monthly support of 5000 NIS for up to six months + accommodations + airfare."

[Added, thanks – T.]

Radek Adamczak · 7 March 2022

There is also this initiative, apologies if it's already listed (I can't see it):

https://sites.google.com/view/ukrainian-mathematicians

[Added, thanks – T.]

Anonymous · 7 March 2022

Good gesture. But aren't men between 18 and 60 not allowed to leave Ukraine? So technically, these only apply to women mathematicians, which are very few.

Alexandra Haedrich · 8 March 2022

Prompted by the events in Ukraine, the Centre de recherches mathématiques and the Institut des sciences mathématiques (Montreal, Canada) offer a program in support of mathematicians in distress due to war, oppression, and persecution: https://crm.umontreal.ca/InitiativeCRM-ISM/en/index.php

[Added, thanks – T.]

jhschenker · 8 March 2022

The Mathematics department at Michigan State University may have up to two positions for mathematics faculty who are displaced by the Ukrainian crisis. Those in need are encouraged to apply to the Michigan State University Research Associate position advertised at https://www.mathjobs.org/jobs/list/18643 and contact a faculty member at MSU who will support their nomination.

[Added, thanks – T.]

Augusto Gerolin · 8 March 2022

PhD and Postdoctoral positions available in my research group at the University of Ottawa https://mysite.science.uottawa.ca/agerolin/openpositions.html

Ukrainian students are highly encouraged to apply.

[Added, thanks – T.]

This is another Brazilian initiative for academics from Mathematical Sciences displaced (or in serious danger) by any war (not only Ukraine).

The Institute of Mathematics, Statistics and Scientific Computing (IMECC) at the University of Campinas (Unicamp) invites researchers in the Mathematical Sciences from countries involved in the conflict in Ukraine and other war-affected countries to apply for the Researchers at Risk Initiative, by the Sao Paulo Research Foundation (Fapesp):
https://fapesp.br/15402/initiative-researchers-at-risk

The scheme will cover scientific stays for 12+ months at any university in the state of Sao Paulo, as well as travel costs, under the following modalities:
— Visiting Researcher Award (PV), granted initially for up to 12 months, which may be reevaluated and extended at Fapesp's discretion, under exceptional circumstances. Guidelines for the submission and selection of PV proposals are available at: https://fapesp.br/index.php/en/visiting
— Post-Doctoral Fellowship lasting up to 24 months, which may be extended. Guidelines for the submission and selection of Post-Doctoral Fellowships are available at: https://fapesp.br/en/postdoc
Applications must be sponsored by a local supervisor/host researcher; links to our

established research groups can be found here:
https://www.ime.unicamp.br/en/research

Tentative applicants may contact our Research Coordinator at IMECC, Professor Marcelo Terra Cunha, at pqimecc@unicamp.br for further information, as well as assistance in matching with our research groups.

Furthermore, if no immediate collaboration can be locally established, we may assist in sharing individual profiles among groups in other Sao Paulo universities.

The call is currently open and applications will be processed as they are received, for expedited implementation, until the scheme's closure on August 30th, 2022.

This is an equal opportunity call, and IMECC particularly welcomes applications from women and underrepresented groups in the Mathematical Sciences, regardless of religion, marital/maternity status, or migratory situation.

Please forward this message to any relevant persons or forums.
Yours sincerely,
Prof. Marcelo Terra Cunha
Research Coordinator | IMECC-Unicamp

Thanks for organising the efforts, Terence!
